

## PROGRESS TO THE END OF DECEMBER 2018:

### Claim Settlement Progress

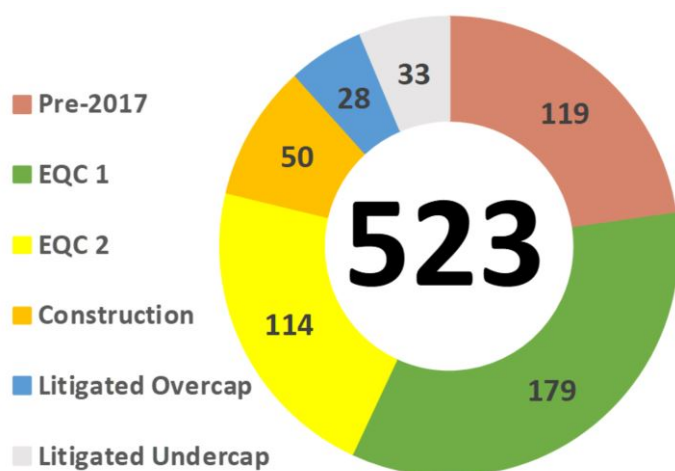

Total Claims	8579
Total Settled	8056
In Progress	523
Dec Settled	57
Dec New	30

As Southern Response has adopted a wider Canterbury customer mandate there has been an increase in claims from EQC. This mandate allows the agency (SR or EQC) best suited to resolve the claim to manage and settle it, regardless if it is under or over the statutory EQC cap.

During the month of December 57 claims were settled and there were 30 new claims from EQC. These claims are predominantly complex undercap remedial claims.

As at the end of December 2018, Southern Response has settled 93.9% (8056 of 8579 claims) of its overcap and undercap claims portfolio.

### Total Open Claims

Total Open Claims	523
Litigated Overcap	28
Litigated Undercap	33
Construction	50
Pre 2017	119
EQC1	179
EQC2	114

Overall there are now 523 unresolved overcap and undercap claims in the business.

Claims in the Construction category are those where a building contract has been signed and Southern Response is managing the construction process.

Pre-2017 claims are those where a cap was paid by EQC prior to 2017.

EQC1 claims are claims identified as possible overcap claims that were proactively retrieved from EQC during 2017 and 2018.

EQC2 claims are claims that are being managed by Southern Response as EQC's agent, which came into the business since 1 October 2018.
